

# MOUNTING CONSTRUCTION

MOUNTING CONSTRUCTION FOR POWERLINE (PL25 & PL35)

## STEP 1

- Screw the clips into the wall with **3x30 z1** screws. The amount of clips depends on the number of meters of powerline.

Note: The PL25 and PL35 use the same clip size.

## STEP 2

- There should be 1 clip per half meter of powerline screwed in to the wall.

## STEP 3

- Click the powerline into the clips which have been attached to the wall. There are two lines at the backside of the powerline that can be clicked into the clips.

# MOUNTING CONSTRUCTION

MOUNTING CONSTRUCTION FOR POWERLINE (PL25 & PL35)

## STEP 3

- Put the strain relief on the wiring and tighten with a twisting motion.
- When the strain relief is secure, tighten once more with a flat head screw driver.

Connect the powerline to the power supply. The counterweight is 35 watt per meter. For example: for 2 meters of powerline a power supply of 70 watt is needed.

# COMPATIBILITY TABLE

MOUNTING CONSTRUCTION FOR LED-SPHERE

## DRIVERS AND ENGINES

	EXTERNAL DRIVER				INTERNAL DRIVER	
	CASAMBI	DMX	DALI	0-10 VOLT	CASAMBI	DMX
